

"MEET THE EXPERTS" DESIGN FORUM

SMP Tech, Inc. Invites you to Meet the Experts Clean Technologies

SMP Tech, Inc. will spotlight new earth friendly products from a technical design standpoint and provide tips and guidelines for designing such products. This will include a look at trends in the Green Movements that influence product design.

FAB Architects will show examples of greening protocols for the electricity auditing of homes and small businesses and will include a simplified model of electricity flow in buildings.

Ops A La Carte will provide information on current trends as well as some of the issues and concerns around reliability in the rapidly expanding Cleantech markets and will include technical information on the benchmarking, reliability, life cycle and end-of-life susceptibility.

SigmaQuest will present how they help photovoltaic companies reduce warranty costs, avoid recalls and eliminate product liability through real-time component supplier, manufacturer and field quality management.

After the presentations and demonstrations, a complimentary lunch will be served to all attendees.

The June 23, 2009 "Meet the Experts" Clean Technologies Forum will spotlight product advances by Green Companies, focusing on sustainable practices and reliability issues associated with the design of products. The forum will also include information on energy monitors and electrical auditing procedures.

TIME AND PLACE

10:30 AM to 12:30 PM

Tuesday, June 23, 2009

Plug and Play Tech Center

440 North Wolfe Road

Sunnyvale, CA 94085
